

Case study

Industraline (HDPE Geomembrane Liner)

Summary

Industrial Plastics supplied and delivered two types of HDPE Geomembrane Liner to a customer in New South Wales. The customer required Industraline in 1.0mm and 1.5mm thickness for their landscaping projects, weighing 273kgs and 818kgs per roll respectively. Two rolls of the 1mm and six rolls of the 1.5mm Industraline were successfully delivered to the happy customer.
